- Analyzed event feedback to drive continuous improvement in booth performance and customer satisfaction.
- Collaborated with a team members to ensure smooth operations, capturing memorable images.
- Maintained equipment safety checks, ensuring smooth operation of the events.

Projects

Calculator with User Interface | *Python*

October 2023

- Developed an interactive calculator application using Python and PySimpleGUI, featuring a user-friendly graphical interface.
- Implemented core functionalities with functions for arithmetic operations including addition, subtraction, multiplication, and division with error handling for edge cases like division by zero.
- Designed the layout with intuitive buttons for digits and operations, ensuring ease of use and accessibility.

Projects on portfolio | *Python, CSS, HTML*

December 2023

- Developed a diverse range of Python applications, showcasing proficiency in different aspects of programming and problem-solving.
- Projects include a functional calculator, a countdown generator, a guessing game, a secure password generator, a PDF combiner, and a YouTube downloader, each demonstrating unique algorithmic approaches.
- Made a personal portfolio website using CSS and HTML, to showcase all of my work, the projects are for review on my personal portfolio, to illustrating my hands-on experience in developing practical Python algorithms.
