Education <https://abbabat.github.io/portfolio/>

University Of Ottawa

Expected Graduation date: December 2027

Bachelor of Applied Science, Software Engineering (CO-OP)

Ottawa, ON

- Relevant courses: Data Structures and Algorithms, Computer Architecture, Computer architecture, Digital Systems, Operating Systems, Software Quality Assurance, Analysis and Design of User Interfaces, Data Structures and Algorithms

Experience

Automation Tester Intern

Jan 2025 – May 2025

Global Affairs Canada

Ottawa, ON

- Built and ran NightWatch.js end-to-end regression suites for NEICS Web across DEV/QA, boosting test reliability.
- Authored XUnit/C# tests with NSubstitute mocks—maintained a 100% pass rate through core logic refactors.
- Performed API database testing and validated ASP.NET Core backend endpoints for functionality, performance, and security.
- Managed test cases, CI/CD pipelines, bug tracking, and pull requests in Azure DevOps.
- Collaborated in Agile ceremonies (daily scrums, sprint planning) to synchronize QA with development sprints.

Web Developer (Part time)

September 2024 – January 2025 & Summer 2025

Stagence

Montreal, QC

- Co-developed Stagence.ca in WordPress, crafting custom themes with HTML, CSS JavaScript for a fully responsive UX.
- Built React components and integrated dynamic content via RESTful APIs, enhancing site interactivity.
- Managed version control and code reviews in Git, ensuring clean merges and streamlined collaboration.
- Optimized site performance—reduced load times by 30% and achieved cross-browser compatibility (Chrome, Firefox, Safari).

Junior Developer Intern

May 2024 – Aug 2024

University of Ottawa

Ottawa, ON

- Maintained and cleaned the Workday ERP database—filtered legacy records and classified new data to boost accuracy.
- Built interactive dashboards from help-desk datasets, visualizing key support metrics to drive process improvements.
- Migrated and managed support tickets (TopDesk → JIRA), categorizing and prioritizing to streamline resolution workflows.
- Enhanced intranet UX by developing and reorganizing pages in Google Sites and Confluence.
- Conducted ERP system tests via proxy-based role simulations and authored launch documentation in SharePoint.

Projects

Class & Team Projects

Dec 2024 – Sep 2024

- **Organization App** (Dec 2024) Built an event-management Android app (Java, Firebase) with role-based access (Organizer/Admin/Attendee), CRUD operations, and real-time data tracking.
- **Client-Server Chat** (Sep 2024) Developed a Java multi-threaded chat system featuring server controls (start/stop), client kick/disconnect, broadcast messaging, and 99% uptime under 10+ concurrent users.

Personal Portfolio | React, JavaScript, HTML, CSS

Dec 2023

- Showcases 4 standalone React/JS apps:
 - * *Guessing Game* (dynamic UI, state management)
 - * *Interactive Shoe Store* (filter, cart simulation)
 - * *Data Dashboard* (charts, API-driven)
 - * *Cleaning Company Site* (responsive layout, contact form)
- Responsive design across devices; deployed with GitHub Pages and Netlify.

Technical Skills

Programming Languages: Python, Java, C#, JavaScript, Assembly, Machine coding, XML

Framework: HTML/CSS, WordPress, React.js,

Testing Framework: XUnit, MSTest, NUnit, NightWatch.js

Tools & platforms: Visual Studio Code, IntelliJ IDEA, Android Studio, Azure DevOps Server, ASP.NET Core, Atlassian Suite: Jira, Confluence, Trello, TopDesk, PIXLR, Adobe Photoshop

Version Control: Git (GitHub and GitLab)

MethodologiesAgile, Unit Testing, API Testing, Database Testing

Microsoft Office 365 Word, Excel, PowerPoint, Outlook, Teams, SharePoint , PowerApps

Soft Skills: Leadership, Multitasking, Time Management, Problem Solving, Effective Communication, Strong Attention to Detail, Thrives in collaborative environments, works effectively in fast-paced settings, bilingual (English & French).
